

ESPERO MOVABLE WALLS PRODUCT BROCHURE

Slidio

Our newest sliding wall

Rabobank, Alphen aan den Rijn (NL)

Thanks to the Slidio wall, the area around this cash machine can be partitioned off in seconds to give customers more privacy.

ESPERO

Simplicity, quality and ease of use all rolled into one

Discover the new Slidio sliding wall and get optimum space reconfigurability.

Set up in one single movement

It takes just one single hand movement to set up or park the entire Slidio sliding wall. This saves you lots of time, because there is just one manoeuvre involved. The wall is also available as a 2-wing version so that the wall can cover an even greater width. The larger version is equally easy to operate.

For what kind of spaces?

The Slidio sliding wall gives you the comfort, ease of use and quality that Espero stands for. This is the ideal wall system when you need a movable wall that lets you open up spaces quickly, but do not have sufficient space for a large wall system. Sliding walls are often used at schools to turn a space into 2 separate classrooms. You can also find them at libraries, office buildings and banks.

Various versions

The Slidio is available in various versions. This movable wall can be supplied with glass or various other finishes, with or without sound insulation and with visible or concealed profiles. We have the right solution for any space. Take a look at all the versions.

Type 45

Glass version with visible profiles and a thickness of 45 mm.

Type 65

Glass or wooden version with visible profiles, a thickness of 65 mm, and a sound-insulation rating of up to 46 dB*.

DENISE School in Amsterdam
